NotWired Overview

The Next Generation of Internet Services

The NotWired Internet Platform is the first full-service offering to provide a system to service millions of users through wired and wireless devices. Your business can instantly roll out highly scalable and secure applications to increase your productivity while lowering your expenses.

NotWired's emerging enterprise solution provides a common control point for application and content services. It delivers services that business professionals use on a daily basis.

Groupware solution

More and more people are collaborating and communicating electronically. With NotWired, users can access email, plan a meeting, manage a task list and share contacts. Users can take advantage of all of NotWired's capabilities with any Internet enabled PC or wireless device. It facilitates coordination and communication using standard email and Internet technologies.

Tasks/Reminders

Tasks can be created and delegated to other users or to anyone with an email address. Track tasks, reassign tasks, mark a task completed, all through the Internet or a wireless device.

Scheduling

Look up contacts, check their schedules for conflicts and invite them to meetings. NotWired tracks invitations and attendance.

Meeting management

Host a meeting, create minutes and assign action items that can be tracked to completion. Busy managers will be able to see the progress of assignments throughout the organization.

Contact management

Keep personal and shared contacts. Track activities and notes on a contact. In addition, contact management is integrated with scheduling so it is easy to coordinate with vendors, suppliers and customers.

Business-class Email

NotWired comes with a robust email application integrated with the contact management and scheduling applications. You may email from contact queries, track email communications with contacts, process inbound meeting or task requests, organize emails into folders, search for emails and more. Additional storage is also available at a low monthly or yearly cost.

Business-class security

NotWired was built with enterprises in mind. It is a secure, password protected system. All applications and data are secure and may operate with or without full encryption.

In addition, NotWired provides applications to allow an organization to manage users' access to all applications and data.

PDA support

With NotWired's Palm Coordinator, Palm PDA users may create meetings with invited participants and assign tasks directly from their Palm device without a network connection.

Extensive wireless support

NotWired supports all major wireless/mobile devices and operates on every major desktop platform supporting IE or Netscape. NotWired supports messaging for all major mobile devices for instant notification and communications.

NotWired Features and Benefits

Hosted solution

NotWired saves you money. The cost of comparable software in the marketplace is thousands of dollars more and requires an on-site technical staff to manage it.

Benefit: Lower cost and no additional IT personnel.

Business focused solution

NotWired was built for business users. It supports multiple user databases and security control of sensitive data. It supports shared and private data and features required by business users.

Benefit: Applications that support people working together as a team.

Integrated, single vendor solution

NotWired integrates all applications seamlessly. Many desktop and hosted solutions require you to cut and paste information from one screen to the next. All NotWired applications are designed to work with each other to give you the highest productivity possible.

Benefit: Higher productivity.

Wireless access and control

You may access NotWired with WAP phones and wireless PDAs. Your mobile workforce will always be able to keep in touch with the office with email and messaging, keep their schedules up to date and get to contact information wherever they might roam.

Benefit: Higher productivity and quicker turnaround on activities.

Disconnected PDA operation

With NotWired's Palm Coordinator product, you may create meetings and assign tasks directly from your PDA. So, while you are on the airplane or out of wireless connection range, you can still be productive.

Benefit: Availability anywhere.

Instant setup and management

NotWired is a hosted service. Simply sign up and invite your teammates and you have an instant business-class office system. Additionally, you can manage users' access to the system from anywhere you have a network connection.

Benefit: Quickly provide a solution without additional hardware, software or staff.

No software to install

NotWired only requires an Internet browser and connection to begin providing instant productivity to your team. There are no software installations so NotWired operates with PCs, Macs, phones and PDAs.

Benefit: Lower costs and no hardware limitations.

Data integrity and security

NotWired has automated backup every night. Your data is always safe and secure and stored in multiple secure areas around the country.

Benefit: No data loss due to theft, fire, employee misconduct or mistakes.

We want to help your team communicate, plan and execute more efficiently. With NotWired you can spend your time on making more revenue and worry less about the systems required to run a business
